

Portsmouth Hospitals NHS Trust

The Eye Department at Queen Alexandra Hospital offers a comprehensive range of ophthalmic services to the local and wider community. Consultant led services include inpatient and outpatient facilities for the investigation and management of all ophthalmic conditions. Our dedicated team of doctors, nurses, orthoptists, optometrists, and ancillary staff take pride in offering a first class service to patients.

Most outpatient clinics are based at Queen Alexandra Hospital where patients can access state of the art diagnostic tools, reducing the need for repeat attendances. Consultants also hold regular peripheral clinics across East Hampshire providing a valuable community service and reducing the need for travel and inconvenience to patients.

Eye surgery is performed either in the purpose-built Eye Day Case Unit at Queen Alexandra Hospital, or in the dedicated Eye theatre within the main hospital building.
